LLEWELLYN POWERS.

By the Covernor,
BYKON HOYD,
Secretary of State.

Ex-Governor Campbell things, Bryan could be elected now. Mr. Campbell has always proved a fallere as a political prophet and seems determined to mainprophet and standard taln his regulation.

The Democrate contended that the tarin bill was not audiciently discussed in the House. The Congressional Record is still publishing tariff speeches although the bill was sent to the Senate some weeks ago.

The grand demonstration stiending the dedication of General Gran's tomb will occur in New York to day. The services of the great Chieffeln will ever

Since 1805 he has been the accredited and responsible representative of the New York Tilbungin the department of the

That was a cheering admission which Congressman Balley, the leader of the majority of the Democratic party is the House, made in discussing ithe Dingley tariff, when he said: "I eptertain no doubt that the immediate effect of, this law will be to stimulate enterprise in the manufacturing sections, and I know pority in these particular section." As the "temperary" prosperity which protective laws gave to the country when they were in force hated as long as those laws themselves. Mr. Bulley's pri lietion of presperity under protection is a very gratifying one.

The Commercial says that the tariff has about as much to do with the price of egricultural products as it has with the rise and fall Our contemporary seems to have slipped, its t olley. For a good many, years past it has preached the doctrine that the tariff was a tax upon the consumer. It slac overlooks the argument of the allver tes in the last campaign when it declares that the law of supply and demand regulates prices because the Bryanites all contend that the fall in the prices of agricultural products was wholly due to the "urline of 1873," We might reproduce some choice outracts from the Conmercisi on this point, but charitably refrain.

The following from the Democratio l'eteraburg Index-Appeal ought to have been read at the meeting of the New York Reform Club Saturday night after some of the free trade speeches:

some of the free tradu specches:

Our ingenious, contemporary, the Norfolk Taufmark attempts to burlusque the Dingles bill by an enumeration or a few free-list articles, such as ashes, bones, hornes, kelestons, turties and other things utterly immaterial either for revenue or for protection, which, he says, with poor will obtain under the Dingley bill." Ho omits, uniterinally, of course, to say anything about the opportunity under that bill which the poor will have to earn wages wherewith it is only dutable articles, if they so, wishing it is only dutable articles, if they so, wishing it is only dutable articles, if they so, wishing the trade to give the poor ashes and bones, and such things, but what the poor want, and what proceeding fees them, is work to earn, wages to buy bread.

The "tremendous reactionist" newspapers are not saying anything about the town and city elections held throughout Ellnois last Tuesday or the Mayor. ally election held in Omaha the same day. The Illinois elections showed conclusively, as the Chicago Inter-Ocean says, that 'so far as the Empire State of the Middle West is concerned there as been no reversal of the opinion enter, tained by the great mass of its voters at the election in November.": The election in Omaha was even more significant. Party lines, were tightly drawn, making the contest's straight one, setween the Republicans and a fusion of the Democrate, Populists and Independents. The latter felt certain of winning, but they were defeated. Such a Republican victory over the combined opposition in the leading city of Mr., Bryan's own State is a significant index of publie opinion in that neighborhood,
